Generic and Energy-Efficient Context-Aware Mobile Sensing

Ozgur Yurur, Chi Harold Liu

Generic and Energy-Efficient Context-Aware Mobile Sensing Ozgur Yurur, Chi Harold Liu

Elaborating on the concept of context awareness, this book presents up-to-date research and novel framework designs for context-aware mobile sensing. **Generic and Energy-Efficient Context-Aware Mobile Sensing** proposes novel context-inferring algorithms and generic framework designs that can help readers enhance existing tradeoffs in mobile sensing, especially between accuracy and power consumption.

The book presents solutions that emphasize must-have system characteristics such as energy efficiency, accuracy, robustness, adaptability, time-invariance, and optimal sensor sensing. Numerous application examples guide readers from fundamental concepts to the implementation of context-aware-related algorithms and frameworks.

Covering theory and practical strategies for context awareness in mobile sensing, the book will help readers develop the modeling and analysis skills required to build futuristic context-aware framework designs for resource-constrained platforms.

- Includes best practices for designing and implementing practical context-aware frameworks in ubiquitous/mobile sensing
- Proposes a lightweight online classification method to detect user-centric postural actions
- Examines mobile device-based battery modeling under the scope of battery nonlinearities with respect to variant loads
- Unveils a novel discrete time inhomogeneous hidden semi-Markov model (DT-IHS-MM)-based generic framework to achieve a better realization of HAR-based mobile context awareness

Supplying theory and equation derivations for all the concepts discussed, the book includes design tips for the implementation of smartphone programming as well as pointers on how to make the best use of MATLAB® for the presentation of performance analysis. Coverage includes lightweight, online, and unsupervised pattern recognition methods; adaptive, time-variant, and optimal sensory sampling strategies; and energy-efficient, robust, and inhomogeneous context-aware framework designs.

Researchers will learn the latest modeling and analysis research on mobile sensing. Students will gain access to accessible reference material on mobile sensing theory and practice. Engineers will gain authoritative insights into cutting-edge system designs.

From reader reviews:

Lauren Barnett:

What do you regarding book? It is not important to you? Or just adding material when you really need something to explain what you problem? How about your spare time? Or are you busy individual? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have extra time? What did you do? All people has many questions above. They should answer that question because just their can do that will. It said that about publication. Book is familiar on every person. Yes, it is correct. Because start from on kindergarten until university need this particular Generic and Energy-Efficient Context-Aware Mobile Sensing to read.

Maurice Lamothe:

Nowadays reading books become more and more than want or need but also turn into a life style. This reading routine give you lot of advantages. The benefits you got of course the knowledge the particular information inside the book in which improve your knowledge and information. The knowledge you get based on what kind of publication you read, if you want get more knowledge just go with knowledge books but if you want really feel happy read one with theme for entertaining like comic or novel. The Generic and Energy-Efficient Context-Aware Mobile Sensing is kind of reserve which is giving the reader capricious experience.

David Mathews:

This book untitled Generic and Energy-Efficient Context-Aware Mobile Sensing to be one of several books that will best seller in this year, honestly, that is because when you read this publication you can get a lot of benefit on it. You will easily to buy this book in the book retail outlet or you can order it by means of online. The publisher of this book sells the e-book too. It makes you quicker to read this book, since you can read this book in your Smart phone. So there is no reason for your requirements to past this reserve from your list.

John Schreiber:

Is it you actually who having spare time and then spend it whole day by watching television programs or just laying on the bed? Do you need something new? This Generic and Energy-Efficient Context-Aware Mobile Sensing can be the solution, oh how comes? A fresh book you know. You are and so out of date, spending your spare time by reading in this brand-new era is common not a geek activity. So what these books have than the others?
