Reducing the Vulnerability of Moldova's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) William R. Sutton, Jitendra P. Srivastava, James E. Neumann, Ana Iglesias, Brent B. Boehlert

Agriculture is one of the most climate-sensitive of all economic sectors. In many countries, such as in Moldova, the risks of climate change are an immediate and fundamental problem because the majority of the rural population depends either directly or indirectly on agriculture for their livelihoods.

The risks of climate change to agriculture in Moldova cannot be effectively dealt with—and the opportunities cannot be effectively exploited—without a clear plan for aligning agricultural policies with climate change, developing the capabilities of key agricultural institutions, and making needed investments in infrastructure, support services and on-farm improvements. Developing such a plan ideally involves a combination of high-quality quantitative analysis, consultation with key stakeholders, particularly farmers and local agricultural experts, and investments in both human and physical capital. The experience of Moldova, highlighted in this work, shows that it is possible to develop a plan to meet these objectives—one that is comprehensive and empirically driven as well as consultative and quick to develop.

The approach of this study is predicated on strong country ownership and participation, and is defined by its emphasis on “win-win” or “no regrets” solutions to the multiple challenges posed by climate change for farmers in Moldova. The solutions are measures that increase resilience to future climate change, boost current productivity despite the greater climate variability already occurring, and limit greenhouse gas emissions.

Reducing The Vulnerability of Moldova's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options applies this approach to Moldova with the goal of helping the country mainstream climate change adaptation into its agricultural policies, programs, and investments. The study projects impacts of climate change on agriculture across Moldova’s three agro-ecological areas through forecast variations in temperature and rainfall patterns so crucial to farming. It offers a map for navigating the risks and realizing the opportunities, outlined through a series of consultations with local farmers. A detailed explanation of the approach is provided for those who would like to implement similar programs in other countries of Europe, Central Asia, or anywhere else in the world.

This is one of four country studies that were produced under the World Bank’s program, “Reducing Vulnerability to Climate Change in European and Central Asian Agricultural Systems”. The other countries included in this series are Albania, FYR Macedonia, and Uzbekistan. The results from the four studies are consolidated in the book *Looking Beyond the Horizon: How Climate Change Impacts and Adaptation Responses Will Reshape Agriculture in Eastern Europe and Central Asia* website..

From reader reviews:

Ruth Ward:

The book Reducing the Vulnerability of Moldova's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) can give more knowledge and information about everything you want. Why must we leave a very important thing like a book Reducing the Vulnerability of Moldova's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies)? Wide variety you have a different opinion about e-book. But one aim that book can give many details for us. It is absolutely suitable. Right now, try to closer together with your book. Knowledge or information that you take for that, you can give for each other; you could share all of these. Book Reducing the Vulnerability of Moldova's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) has simple shape but the truth is know: it has great and big function for you. You can search the enormous world by available and read a guide. So it is very wonderful.

Dorcas Starling:

Reading a e-book tends to be new life style in this era globalization. With reading through you can get a lot of information that can give you benefit in your life. Together with book everyone in this world could share their idea. Publications can also inspire a lot of people. Many author can inspire all their reader with their story or their experience. Not only situation that share in the guides. But also they write about the knowledge about something that you need instance. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors nowadays always try to improve their skill in writing, they also doing some study before they write to their book. One of them is this Reducing the Vulnerability of Moldova's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies).

Sheila Dickerson:

You could spend your free time to study this book this publication. This Reducing the Vulnerability of Moldova's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) is simple to develop you can read it in the recreation area, in the beach, train as well as soon. If you did not possess much space to bring the actual printed book, you can buy often the e-book. It is make you easier to read it. You can save often the book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.

Ali Ellison:

You can find this Reducing the Vulnerability of Moldova's Agricultural Systems to Climate Change: Impact Assessment and Adaptation Options (World Bank Studies) by look at the bookstore or Mall. Simply viewing or reviewing it could possibly to be your solve challenge if you get difficulties for ones knowledge. Kinds of

this book are various. Not only by simply written or printed but also can you enjoy this book by means of e-book. In the modern era just like now, you just looking by your mobile phone and searching what their problem. Right now, choose your ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose correct ways for you.
