## **Financial Reporting Standards: A Decision-Making Perspective for Non-Accountants (Financial Accounting and Auditing Collection) David T. Doran**

Accounting is the score keeping system in the “game” of business, and you won’t do well in any “game” if you don’t understand how the score is

kept. If you’re a practicing manager, MBA student, or a non-accounting business major, this book will do more than help you stay in the game.

Inside, United States financial reporting standards are compared and contrasted with international financial reporting standards, and the

authors detail how management’s choice of accounting methods and their required estimates in reporting transactions and events impact

financial statements, both immediately and in the future. Unlike typical accounting books, journal entries are not used to illustrate topical coverage.

This unique book exclusively provides you with a decision-making perspective by using the accounting equation format to directly

illustrate financial statement effects of transactions and events. Most of the topics addressed in this book are typically studied by accounting

majors in the two course “intermediate” accounting sequence, but the text also includes discussion of consolidations—a topic generally

covered in the “advanced” accounting course. Intermediate accounting textbooks alone typically exceed well over 1,500 pages. By exclusively

applying a user’s perspective, and limiting topical content to areas relevant for decision making, this book allows non-accountants to

acquire the requisite underlying knowledge in a concise, easy to understand text.
