Health Care Ethics, Fifth Edition: Health Care Ethics: A Catholic Theological Analysis Benedict M. Ashley

Health Care Ethics is a comprehensive study of significant issues affecting health care and the ethics of health care from the perspective of Catholic theology. It aims to help Christian, and especially Catholic, health care professionals solve concrete problems in terms of principles rooted in scripture and tested by individual experience; however, its basis in real medical experience makes this book a valuable resource for anyone with a general interest in health care ethics.

This fifth edition, which includes important contributions by Jean deBlois, C.S.J., considers everyday ethical questions and dilemmas in clinical care and deals more deeply with issues of women's health, mental health, sexual orientation, artificial reproduction, and the new social issues in health care. The authors devote special attention to the various ethical theories currently in use in the United States while clearly presenting a method of ethical decision making based in the Catholic tradition. They discuss the needs of the human person, outlining what it means to be human, both as an individual and as part of a community.

This volume has been significantly updated to include new discussions of recent clinical innovations and theoretical issues that have arisen in the field:

the Human Genome Project

efforts to control sexual selection of infants

efforts to genetically modify the human genotype and phenotype

the development of palliative care as a medical specialty

the acceptance of non-heart beating persons as organ donors

embryo development and stem cell research

reconstructive and cosmetic surgery

nutrition and obesity

medical mistakes

the negative effects of managed care on the patient-physician relationship

recent papal allocution regarding care of patients in a persistent vegetative state and palliative care for dying patients
