Geocomputation: A Practical Primer

Geocomputation: A Practical Primer

Geocomputation is the use of software and computing power to solve complex spatial problems. It is gaining increasing importance in the era of the 'big data' revolution, of 'smart cities', of crowdsourced data, and of associated applications for viewing and managing data geographically - like Google Maps. This student focused book:

- Provides a selection of practical examples of geocomputational techniques and 'hot topics' written by world leading practitioners.
- Integrates supporting materials in each chapter, such as code and data, enabling readers to work through the examples themselves.

Chapters provide highly applied and practical discussions of:

- Visualisation and exploratory spatial data analysis
- Space time modelling
- Spatial algorithms
- Spatial regression and statistics
- Enabling interactions through the use of neogeography

All chapters are uniform in design and each includes an introduction, case studies, conclusions - drawing together the generalities of the introduction and specific findings from the case study application – and guidance for further reading.

This accessible text has been specifically designed for those readers who are new to Geocomputation as an area of research, showing how complex real-world problems can be solved through the integration of technology, data, and geocomputational methods. This is the applied primer for Geocomputation in the social sciences.

From reader reviews:

Nancy Mitchell:

Why don't make it to become your habit? Right now, try to prepare your time to do the important work, like looking for your favorite publication and reading a guide. Beside you can solve your long lasting problem; you can add your knowledge by the e-book entitled Geocomputation: A Practical Primer. Try to make book Geocomputation: A Practical Primer as your close friend. It means that it can for being your friend when you really feel alone and beside that course make you smarter than previously. Yeah, it is very fortunated in your case. The book makes you a lot more confidence because you can know every little thing by the book. So , let's make new experience as well as knowledge with this book.

Geraldine Dube:

Book is actually written, printed, or descriptive for everything. You can know everything you want by a publication. Book has a different type. To be sure that book is important thing to bring us around the world. Adjacent to that you can your reading expertise was fluently. A book Geocomputation: A Practical Primer will make you to end up being smarter. You can feel more confidence if you can know about every little thing. But some of you think this open or reading a book make you bored. It is far from make you fun. Why they are often thought like that? Have you trying to find best book or suited book with you?

Yvonne Casey:

In this 21st century, people become competitive in every way. By being competitive today, people have do something to make all of them survives, being in the middle of the actual crowded place and notice by simply surrounding. One thing that sometimes many people have underestimated this for a while is reading. Sure, by reading a publication your ability to survive boost then having chance to endure than other is high. To suit your needs who want to start reading some sort of book, we give you this particular Geocomputation: A Practical Primer book as nice and daily reading book. Why, because this book is greater than just a book.

Barbara Corbin:

Reading a publication tends to be new life style in this particular era globalization. With studying you can get a lot of information that can give you benefit in your life. Using book everyone in this world can certainly share their idea. Books can also inspire a lot of people. A lot of author can inspire their own reader with their story or their experience. Not only the storyplot that share in the ebooks. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors on earth always try to improve their proficiency in writing, they also doing some study before they write to their book. One of them is this Geocomputation: A Practical Primer.
