Colloquy on Minority Males in Science, Technology, Engineering, and Mathematics Catherine Didion, Norman L. Fortenberry, Elizabeth Cady, National Academy of Engineering

On August 8-12, 2010 the National Academy of Engineering (NAE), with funding from the National Science Foundation (NSF), convened the Colloquy on Minority Males in Science, Technology, Engineering, and Mathematics (STEM), following the release of several reports highlighting the educational challenges facing minority males. The NSF recognized the need to gather input from research communities that focus on minority males about how to frame investigations of gender-based factors that impact learning and choice in STEM education (both at the precollege and higher education levels) and the workforce for minority males. There was particular interest in framing a research agenda to study how interactions between minority males and societal and educational systems (both formal and informal) encourage or discourage the young men's interest and persistence in STEM. In addition, NSF hoped to gain community input to inform the parameters of a future NSF research program that could effectively address minority male participation in STEM. The Colloquy was held at the Mt. Washington Conference Center in Baltimore, Maryland, with approximately 40 participants, most of them researchers in education, psychology, sociology, mathematics, and physics.

Colloquy on Minority Males in Science, Technology, Engineering, and Mathematics presents a summary of the Colloquy's breakout and plenary discussions, which addressed (a) research questions articulated in the breakout groups together with theories and methodologies to begin to address these questions; and (b) considerations for a potential research solicitation for the NSF, with major areas of inquiry concerning access, participation, and success for minority males in STEM.

This report reflects the views of the individuals who participated in the plenary and breakout groups. It has been reviewed in draft form by persons chosen for their diverse perspectives and expertise in accordance with procedures approved by the National Academies' Report Review Committee. The purpose of this independent review is to provide candid and critical comments that will assist the institution in making its published report as sound as possible and to ensure that the report meets institutional standards for quality and objectivity.

From reader reviews:

Diane Dean:

Book is written, printed, or created for everything. You can learn everything you want by a guide. Book has a different type. As you may know that book is important point to bring us around the world. Next to that you can your reading ability was fluently. A book Colloquy on Minority Males in Science, Technology, Engineering, and Mathematics will make you to be smarter. You can feel more confidence if you can know about every little thing. But some of you think that will open or reading a new book make you bored. It is far from make you fun. Why they are often thought like that? Have you in search of best book or acceptable book with you?

Margie Turner:

Is it you actually who having spare time after that spend it whole day by watching television programs or just resting on the bed? Do you need something totally new? This Colloquy on Minority Males in Science, Technology, Engineering, and Mathematics can be the respond to, oh how comes? The new book you know. You are therefore out of date, spending your spare time by reading in this brand-new era is common not a geek activity. So what these publications have than the others?

Allen Mullinax:

Do you like reading a book? Confuse to looking for your chosen book? Or your book has been rare? Why so many issue for the book? But virtually any people feel that they enjoy with regard to reading. Some people likes studying, not only science book but additionally novel and Colloquy on Minority Males in Science, Technology, Engineering, and Mathematics or maybe others sources were given know-how for you. After you know how the fantastic a book, you feel desire to read more and more. Science book was created for teacher or even students especially. Those guides are helping them to include their knowledge. In different case, beside science e-book, any other book likes Colloquy on Minority Males in Science, Technology, Engineering, and Mathematics to make your spare time much more colorful. Many types of book like this.

Ella Nebel:

Reading a publication make you to get more knowledge from the jawhorse. You can take knowledge and information from the book. Book is published or printed or highlighted from each source in which filled update of news. Within this modern era like right now, many ways to get information are available for anyone. From media social such as newspaper, magazines, science book, encyclopedia, reference book, story and comic. You can add your understanding by that book. Ready to spend your spare time to spread out your book? Or just in search of the Colloquy on Minority Males in Science, Technology, Engineering, and Mathematics when you required it?
