## **Handbook of Scientific Proposal Writing** A.Yavuz Oruc

Investigators, their home institutions, and funding agencies play significant roles in the development and outcomes of scientific projects. Submitting a proposal to a funding agency is only one dimension of a multivariable and complex funding process, and understanding this is a good first step toward unlocking the puzzle behind why some research proposals receive awards while others are declined. The **Handbook of Scientific Proposal Writing** offers researchers and research administrators a broad perspective on the process of initiating and conducting funded scientific research projects.

Written for students and researchers in all fields and disciplines, this reference offers a holistic approach to conceiving and then converting new ideas into effective proposals. It focuses on the technical aspects of writing proposals rather than the fund-raising issues. Chapters provide full coverage of the scientific method, including information on how scientific research should be conducted.

Providing the tools necessary to organize ideas and obtain the funds needed to effectively manage projects, the **Handbook of Scientific Proposal Writing** includes:

- 56 figures and 25 tables to help convey key ideas
- More than 150 citations that provide pointers to additional sources for further reading
- Examples to help the reader ease through more abstract concepts
- End-of-chapter questions to stimulate further examination and comprehension
