## Exploring Advanced Technologies for the Future Combat Systems Program

This report summarizes the research findings of a short-time-frame study conducted by RAND Arroyo Center to support the Army Science Board (ASB) Summer Study 2000, "Technical and Tactical Opportunities for Revolutionary Advances in Rapidly Deployable Joint Ground Forces in the 2015-2020 Era." The purpose of the RAND research was to explore a range of advanced technologies for potential contribution to the Future Combat Systems program. In the context of the ASB's fundamental purpose--to evaluate advanced technologies within new operational concepts for the future vision of the Army--this research focused on a small-scale contingency and the associated spectrum of challenges this type of scenario might entail. In conducting the study, the research team interacted with various members of the ASB and, in particular, with key members of the Operations panel, drawing extensively on their forward-looking ideas and ultimately integrating many of these ideas into the research. High-resolution combat modeling and simulation was used to assess the many key aspects of force performance, environmental effects, and system-of-system effects.

### **From reader reviews:**

#### **Sang Weems:**

Have you spare time for any day? What do you do when you have more or little spare time? Yes, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to the actual Mall. How about open or perhaps read a book allowed Exploring Advanced Technologies for the Future Combat Systems Program? Maybe it is being best activity for you. You understand beside you can spend your time with your favorite's book, you can wiser than before. Do you agree with their opinion or you have various other opinion?

#### **Cora Snyder:**

Now a day individuals who Living in the era wherever everything reachable by interact with the internet and the resources within it can be true or not require people to be aware of each information they get. How people have to be smart in getting any information nowadays? Of course the answer then is reading a book. Studying a book can help people out of this uncertainty Information especially this Exploring Advanced Technologies for the Future Combat Systems Program book because book offers you rich information and knowledge. Of course the information in this book hundred percent guarantees there is no doubt in it everybody knows.

#### **Sena Meyer:**

Is it an individual who having spare time and then spend it whole day through watching television programs or just lying on the bed? Do you need something new? This Exploring Advanced Technologies for the Future Combat Systems Program can be the response, oh how comes? The new book you know. You are so out of date, spending your extra time by reading in this completely new era is common not a nerd activity. So what these books have than the others?

#### **Maxine Ford:**

As a scholar exactly feel bored to help reading. If their teacher requested them to go to the library or to make summary for some reserve, they are complained. Just little students that has reading's heart and soul or real their interest. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading significantly. Any students feel that examining is not important, boring as well as can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore , this Exploring Advanced Technologies for the Future Combat Systems Program can make you truly feel more interested to read.
