Encontrar los puntos discordinantes entre la teoría de la relatividad y la teoría cuántica es el sueño actual de la ciencia. Aquí se muestra una teoría con una visión de la sísica que manipulará principios básicos como el movimiento, el tiempo y la velocidad, para llegar por ese camino un universo en el que con su arquitectura se explican las diferencias y las coincidencias de ambas teorías. El autor invita a demostrarla a través de los experimentos que se exponen dentro de sus páginas.
