Local Algebra (Springer Monographs in Mathematics)

Jean-Pierre Serre

Local Algebra (Springer Monographs in Mathematics) Jean-Pierre Serre

This is an English translation of the now classic "Algre Locale - Multiplicits" originally published by Springer as LNM 11. It gives a short account of the main theorems of commutative algebra, with emphasis on modules, homological methods and intersection multiplicities. Many modifications to the original French text have been made for this English edition, making the text easier to read, without changing its intended informal character.
