A powerful guide for applying brain research for more effective instruction

The Brain-Targeted Teaching Model for 21st-Century Schools serves as a bridge between research and practice by providing a cohesive, proven, and usable model of effective instruction. Compatible with other professional development programs, this model shows how to apply educational and cognitive neuroscience principles into classroom settings through a pedagogical framework. The model's six components are:

- (1) Establish the emotional connection to learning
- (2) Develop the physical learning environment
- (3) Design the learning experience
- (4) Teach for the mastery of content, skills, and concepts
- (5) Teach for the extension and application of knowledge
- (6) Evaluate learning
