Discover How to Apply DES to Problems Encountered in HTA

Discrete event simulation (DES) has traditionally been used in the engineering and operations research fields. The use of DES to inform decisions about health technologies is still in its infancy. Written by specialists at the forefront of this area, **Discrete Event Simulation for Health Technology Assessment** is the first book to make all the central concepts of DES relevant for health technology assessment (HTA). Accessible to beginners, the book requires no prerequisites and describes the concepts with as little jargon as possible.

The book first covers the essential concepts and their implementation. It next provides a fully worked out example using both a widely available spreadsheet program (Microsoft Excel) and a popular specialized simulation package (Arena). It then presents approaches to analyze the simulations, including the treatment of uncertainty; tackles the development of the required equations; explains the techniques to verify that the models are as efficient as possible; and explores the indispensable topic of validation. The book also covers a variety of non-essential yet handy topics, such as the animation of a simulation and extensions of DES, and incorporates a real case study involving screening strategies for breast cancer surveillance.

This book guides you in leveraging DES in your assessments of health technologies. After reading the chapters in sequence, you will be able to construct a realistic model designed to help in the assessment of a new health technology.

From reader reviews:

James Sanchez:

Book is to be different per grade. Book for children till adult are different content. As you may know that book is very important for people. The book Discrete Event Simulation for Health Technology Assessment was making you to know about other knowledge and of course you can take more information. It is quite advantages for you. The e-book Discrete Event Simulation for Health Technology Assessment is not only giving you a lot more new information but also to become your friend when you sense bored. You can spend your own personal spend time to read your e-book. Try to make relationship with all the book Discrete Event Simulation for Health Technology Assessment. You never sense lose out for everything in case you read some books.

Joseph Cobble:

In this 21st hundred years, people become competitive in each way. By being competitive right now, people have do something to make these individuals survives, being in the middle of typically the crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated it for a while is reading. Yeah, by reading a publication your ability to survive improve then having chance to stand than other is high. For you personally who want to start reading some sort of book, we give you this specific Discrete Event Simulation for Health Technology Assessment book as nice and daily reading reserve. Why, because this book is more than just a book.

Jill Williams:

Do you like reading a reserve? Confuse to looking for your favorite book? Or your book seemed to be rare? Why so many problem for the book? But virtually any people feel that they enjoy to get reading. Some people likes studying, not only science book but also novel and Discrete Event Simulation for Health Technology Assessment or perhaps others sources were given information for you. After you know how the truly amazing a book, you feel want to read more and more. Science e-book was created for teacher as well as students especially. Those books are helping them to bring their knowledge. In different case, beside science book, any other book likes Discrete Event Simulation for Health Technology Assessment to make your spare time far more colorful. Many types of book like this.

Greg Christenson:

Some people said that they feel bored when they reading a reserve. They are directly felt this when they get a half areas of the book. You can choose the particular book Discrete Event Simulation for Health Technology Assessment to make your own personal reading is interesting. Your current skill of reading skill is developing when you like reading. Try to choose basic book to make you enjoy to study it and mingle the sensation about book and examining especially. It is to be first opinion for you to like to wide open a book and learn it. Beside that the book Discrete Event Simulation for Health Technology Assessment can to be a

newly purchased friend when you're sense alone and confuse with the information must you're doing of that time.
