Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering)

Sunggyu Lee, Y.T. Shah

The newest addition to the *Green Chemistry and Chemical Engineering* series from CRC Press, **Biofuels and Bioenergy: Processes and Technologies** provides a succinct but in-depth introduction to methods of development and use of biofuels and bioenergy. The book illustrates their great appeal as tools for solving the economic and environmental challenges associated with achieving energy sustainability and independence through the use of clean, renewable alternative energy. Taking a process engineering approach rooted in the fuel and petrochemical fields, this book masterfully integrates coverage of current conventional processes and emerging techniques.

Topics covered include:

- Characterization and analysis of biofuels
- Process economics
- Chemistry of process conversion
- Process engineering and design and associated environmental technologies
- Energy balances and efficiencies
- Reactor designs and process configurations
- Energy materials and process equipment
- Integration with other conventional fossil fuel processes
- Byproduct utilization
- Governmental regulations and policies and global trends

After an overview of the subject, the book discusses crop oils, biodiesel, and algae fuels. It examines ethanol from corn and from lignocelluloses and then explores fast pyrolysis and gasification of biomass. Discussing the future of biofuel production, it also describes the conversion of waste to biofuels, bioproducts, and bioenergy and concludes with a discussion of mixed feedstock. Written for readers with college-level backgrounds in chemistry, biology, physics, and engineering, this reference explores the science and

technology involved in developing biofuels and bioenergy. It addresses the application of these and other disciplines, covering key issues of special interest to fuel process engineers, fuel scientists, and energy technologists, among others.

From reader reviews:

Margaret Head:

What do you with regards to book? It is not important to you? Or just adding material if you want something to explain what the ones you have problem? How about your free time? Or are you busy person? If you don't have spare time to accomplish others business, it is make one feel bored faster. And you have free time? What did you do? All people has many questions above. They need to answer that question since just their can do that will. It said that about e-book. Book is familiar in each person. Yes, it is appropriate. Because start from on jardín de infancia until university need this particular Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering) to read.

Jeffrey Dominguez:

Do you among people who can't read satisfying if the sentence chained inside straightway, hold on guys this kind of aren't like that. This Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering) book is readable by you who hate the straight word style. You will find the data here are arrange for enjoyable looking at experience without leaving actually decrease the knowledge that want to supply to you. The writer connected with Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering) content conveys the idea easily to understand by a lot of people. The printed and e-book are not different in the content but it just different in the form of it. So , do you nonetheless thinking Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering) is not loveable to be your top record reading book?

Josue Denson:

People live in this new day of lifestyle always attempt to and must have the extra time or they will get wide range of stress from both day to day life and work. So , whenever we ask do people have spare time, we will say absolutely sure. People is human not really a robot. Then we request again, what kind of activity are you experiencing when the spare time coming to you actually of course your answer may unlimited right. Then do you try this one, reading guides. It can be your alternative in spending your spare time, often the book you have read is usually Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering).

Gary Askew:

As we know that book is vital thing to add our expertise for everything. By a publication we can know everything we wish. A book is a range of written, printed, illustrated or blank sheet. Every year has been exactly added. This e-book Biofuels and Bioenergy: Processes and Technologies (Green Chemistry and Chemical Engineering) was filled about science. Spend your time to add your knowledge about your research competence. Some people has different feel when they reading some sort of book. If you know how big good thing about a book, you can truly feel enjoy to read a reserve. In the modern era like at this point,

many ways to get book which you wanted.
