*Dominik Wodarz, Natalia L Komarova*

**Dynamics of Cancer:Mathematical Foundations of Oncology** Dominik Wodarz, Natalia L Komarova

The book aims to provide an introduction to mathematical models that describe the dynamics of tumor growth and the evolution of tumor cells. It can be used as a textbook for advanced undergraduate or graduate courses, and also serves as a reference book for researchers. The book has a strong evolutionary component and reflects the viewpoint that cancer can be understood rationally through a combination of mathematical and biological tools. It can be used both by mathematicians and biologists. Mathematically, the book starts with relatively simple ordinary differential equation models, and subsequently explores more complex stochastic and spatial models. Biologically, the book starts with explorations of the basic dynamics of tumor growth, including competitive interactions among cells, and subsequently moves on to the evolutionary dynamics of cancer cells, including scenarios of cancer initiation, progression, and treatment. The book finishes with a discussion of advanced topics, which describe how some of the mathematical concepts can be used to gain insights into a variety of questions, such as epigenetics, telomeres, gene therapy, and social interactions of cancer cells.

## **Contents:**

- Teaching Guide
- Cancer and Somatic Evolution
- Mathematical Modeling of Tumorigenesis
- **Basic Growth Dynamics and Deterministic Models:**
  - Single Species Growth
  - Two-Species Competition Dynamics
  - Competition Between Genetically Stable and Unstable Cells
  - Chromosomal Instability and Tumor Growth
  - Angiogenesis Inhibitors, Promoters, and Spatial Growth
- **Evolutionary Dynamics and Stochastic Models:**
  - Evolutionary Dynamics of Tumor Initiation Through Oncogenes: The Gain-of-Function Model
  - Evolutionary Dynamics of Tumor Initiation Through Tumor-Suppressor Genes: The Loss-of-Function Model and Stochastic Tunneling
  - Microsatellite and Chromosomal Instability in Sporadic and Familial Colorectal Cancers
  - Evolutionary Dynamics in Hierarchical Populations
  - Spatial Evolutionary Dynamics of Tumor Initiation
  - Complex Tumor Dynamics in Space
  - Stochastic Modeling of Cellular Growth, Treatment, and Resistance Generation
  - Evolutionary Dynamics of Drug Resistance in Chronic Myeloid Leukemia
- **Advanced Topics:**
  - Evolutionary Dynamics of Stem-Cell Driven Tumor Growth
  - Tumor Growth Kinetics and Disease Progression
  - Epigenetic Changes and the Rate of DNA Methylation
  - Telomeres and Cancer Protection
  - Gene Therapy and Oncolytic Virus Therapy
  - Immune Responses, Tumor Growth, and Therapies
  - Towards Higher Complexities: Social Interactions

**Readership:** Researchers in mathematical biology, mathematical modeling, biology, mathematical oncology.

### **From reader reviews:**

#### **Marcus Galvan:**

Inside other case, little persons like to read book Dynamics of Cancer:Mathematical Foundations of Oncology. You can choose the best book if you appreciate reading a book. As long as we know about how is important some sort of book Dynamics of Cancer:Mathematical Foundations of Oncology. You can add expertise and of course you can around the world by a book. Absolutely right, since from book you can understand everything! From your country right up until foreign or abroad you will be known. About simple thing until wonderful thing you could know that. In this era, we can easily open a book as well as searching by internet product. It is called e-book. You should use it when you feel bored to go to the library. Let's read.

#### **Angela Heller:**

Do you have something that you prefer such as book? The guide lovers usually prefer to pick book like comic, small story and the biggest the first is novel. Now, why not attempting Dynamics of Cancer:Mathematical Foundations of Oncology that give your entertainment preference will be satisfied through reading this book. Reading routine all over the world can be said as the method for people to know world considerably better then how they react toward the world. It can't be said constantly that reading routine only for the geeky man or woman but for all of you who wants to end up being success person. So , for every you who want to start examining as your good habit, it is possible to pick Dynamics of Cancer:Mathematical Foundations of Oncology become your own personal starter.

#### **Joyce Morgan:**

Your reading 6th sense will not betray you, why because this Dynamics of Cancer:Mathematical Foundations of Oncology publication written by well-known writer who knows well how to make book that may be understand by anyone who also read the book. Written in good manner for you, leaking every ideas and publishing skill only for eliminate your hunger then you still skepticism Dynamics of Cancer:Mathematical Foundations of Oncology as good book not just by the cover but also with the content. This is one book that can break don't assess book by its protect, so do you still needing an additional sixth sense to pick this particular!? Oh come on your studying sixth sense already alerted you so why you have to listening to another sixth sense.

#### **Pearl Dyson:**

In this time globalization it is important to someone to find information. The information will make you to definitely understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You can observe that now, a lot of publisher this print many kinds of book. The actual book that recommended to your account is Dynamics of Cancer:Mathematical Foundations of Oncology this e-book consist a lot of the information with the condition of this world now. This book was represented so why is the world has grown

up. The language styles that writer use to explain it is easy to understand. Often the writer made some study when he makes this book. Honestly, that is why this book suitable all of you.
