**Understanding Cognitive Development (Discoveries & Explanations in Child Development)** Maggie McGonigle-Chalmers

**Understanding Cognitive Development** provides a fresh, evidence-based research perspective on the story of children's cognitive development in the first ten years of human life.

Starting with a brief survey of the key theoretical positions that have come to define developmental psychology, the textbook then focuses on the different cognitive abilities as they emerge throughout early development. Uniquely, it examines these in terms of their interdependence; that is how skills such as perception, memory, language and reasoning relate to one another. This holistic treatment allows students to see the many important intersections in this critical phase of human life development.

This textbook employs a novel design that will be of immense help to both students and instructors and is intended to be read at two levels: at the first level, it provides a fully referenced explanatory account of experimental research on cognitive development with complete attention to the needs of students who have never been exposed to experimental methodology nor studies in cognitive development before.

At the second level, and mapped directly onto numbered sub-sections within the text, the author uses illustrative panels designed along the lines of PowerPoint presentations to summarise studies and key findings, employing lots of pictorial material together with bullet-points to give vividness and texture to the material covered. These panels are replicated on the accompanying companion website in PowerPoint for lecturers and students to make further use of in teaching and revision. Revision points are provided at the end of every chapter.

Rich in academic coverage, including a widespread database of the most important empirical research in the field, this textbook will be essential reading for students of cognitive development and developmental psychology across psychology and education.

### **From reader reviews:**

#### **Margaret Hall:**

Do you have favorite book? If you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each book has different aim or maybe goal; it means that guide has different type. Some people really feel enjoy to spend their time to read a book. They can be reading whatever they have because their hobby will be reading a book. Consider the person who don't like reading through a book? Sometime, man feel need book if they found difficult problem or perhaps exercise. Well, probably you'll have this Understanding Cognitive Development (Discoveries & Explanations in Child Development).

#### **Gregory Rivera:**

Why? Because this Understanding Cognitive Development (Discoveries & Explanations in Child Development) is an unordinary book that the inside of the guide waiting for you to snap the item but latter it will shock you with the secret the idea inside. Reading this book beside it was fantastic author who else write the book in such amazing way makes the content inside easier to understand, entertaining approach but still convey the meaning fully. So , it is good for you because of not hesitating having this any more or you going to regret it. This phenomenal book will give you a lot of rewards than the other book get such as help improving your skill and your critical thinking technique. So , still want to postpone having that book? If I were being you I will go to the e-book store hurriedly.

#### **Lauren Clarke:**

That reserve can make you to feel relax. That book Understanding Cognitive Development (Discoveries & Explanations in Child Development) was bright colored and of course has pictures on there. As we know that book Understanding Cognitive Development (Discoveries & Explanations in Child Development) has many kinds or type. Start from kids until teens. For example Naruto or Private eye Conan you can read and feel that you are the character on there. Therefore not at all of book tend to be make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book for yourself and try to like reading that will.

#### **Amy Osburn:**

As a college student exactly feel bored to be able to reading. If their teacher questioned them to go to the library or to make summary for some publication, they are complained. Just tiny students that has reading's heart and soul or real their interest. They just do what the teacher want, like asked to go to the library. They go to there but nothing reading really. Any students feel that reading through is not important, boring and can't see colorful pics on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Understanding Cognitive Development (Discoveries & Explanations in Child Development) can make you really feel more interested to read.
