Connaître les maladies est l'indispensable grille de lecture pour élaborer un diagnostic et envisager une stratégie thérapeutique, mais comprendre le malade est tout aussi indispensable pour adapter les connaissances théoriques à leur mise en pratique.

Les auteurs, neurologue et psychologue, ayant une longue pratique épileptologique, font le point sur les connaissances actuelles et leurs applications pour soigner les maladies et accompagner le patient et sa famille.

Certains chapitres sont d'ordre médical, d'autres d'ordre psychologique et sociologique, reflet d'une interdisciplinarité nécessaire pour comprendre et agir. Des cas cliniques éclairent les propos des auteurs et mettent en évidence la complexité et la diversité des profils des personnes présentant une maladie épileptique.

Enfin, cet ouvrage propose de possibles améliorations pour demain, à développer avec les professionnels de santé comme avec les malades et leur famille : dépasser l'approche crisologique seule pour prendre en compte dans une stratégie thérapeutique globale, outre les caractères électrocliniques des épilepsies, les profils psychologiques des patients et les comportements de leur entourage.
